

# EFC Assistance to Utilities in the Viable Utilities Program

**North Carolina Viable Utilities Program:**  
Provides funding to build a path towards viable utility systems using long-term solutions for water and wastewater distressed utilities. Administered by SWIA and the LGC.

## How the Environmental Finance Center can help

### Modeling Tools

- Financial Health Checkup
- Rates Analysis
- Capital Funding Scenarios
- Affordability Assessment

### Advising and Review

- Assist in developing short term and long term action plan to viability
- Long-term rate analysis
- Advise on practices to improve areas which have contributed to the distressed designation

### Resource Guides

- Interlocal Agreement Guide
- Regionalization Guide
- One page guides and case studies on viability, regionalization, funding, and other topics

### Board and Management Education

- Utility finance
- Rates
- Capital Planning and funding
- Regionalization
